

Prevent the Loss of Confidential Data in Motion

Data Loss Prevention for XTM and XTMv Solutions

WatchGuard Data Loss Prevention (DLP) is the newest addition to WatchGuard's Unified Threat Management (UTM) platform. This affordable, subscription-based service can be easily added to any XTM solution for a powerful layer of protection from data loss.

Key Benefits:

- **Quick policy configuration.** A built-in library of over 200 rules allows IT to quickly create and update corporate DLP policies.
- **Automatic protection.** All data in motion transmitted via email, web, or FTP is automatically scanned against your rule set.
- **Broad coverage.** WatchGuard DLP can parse data from more than 30 file types including Excel, Word, Visio, PowerPoint, and PDFs.
- **Compliance made easy.** Built-in sensors are included for PCI DSS and HIPAA compliance mandates.
- **Internal controls.** Maintain the flow of vital business communication with multiple remediation options. You can choose to block or log flagged transmissions, or quarantine them for review.
- **Ease of management.** Use the same intuitive console for DLP as you do for any other services running on your WatchGuard UTM platform.

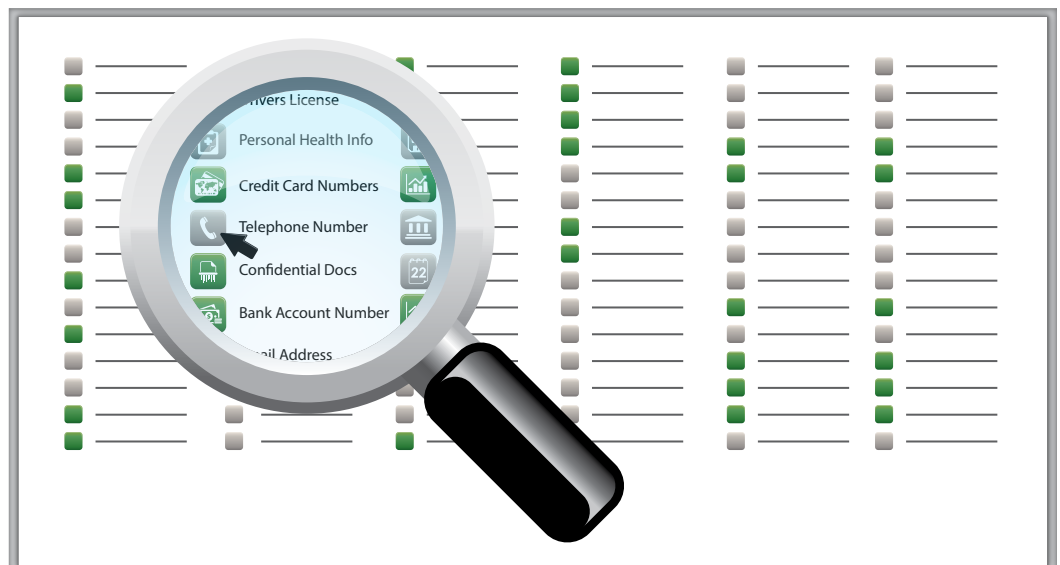

Allowing sensitive or confidential data to fall into the hands of outsiders has serious consequences for your business. Whether it happens accidentally or with malicious intent, a data breach can mean costly fines for compliance violations, loss of consumer confidence, and a tarnished brand.

WatchGuard Data Loss Prevention is a uniquely comprehensive service for the WatchGuard UTM platform that helps keep private data private. It's affordable, easy to configure, and integrated into WatchGuard's award-winning XTM family of network security solutions.

WatchGuard DLP prevents data breaches by scanning text and common file types to detect sensitive information. All data in motion, whether transferred via email, web, or FTP, is automatically inspected. Unlike other UTM DLP vendors, WatchGuard's subscription-based service includes a predefined library of more than 200 rules for 18 countries, covering personally identifiable information (PII), financial data, and healthcare information. Rule sets are updated monthly to stay current with data definitions and compliance mandates around the world.

Protect the data YOU care about most

Setting DLP policy is as easy as point and click, using 200+ rules covering data types for 18 countries.

WATCHGUARD UTM PLATFORM

Flexible architecture blocks network threats while optimizing performance

WatchGuard's UTM (unified threat management) platform is designed to allow network traffic to pass through a full suite of UTM services – from anti-spam protection to Data Loss Prevention – at top performance levels. Leveraging the power of multi-core processing, the platform runs all scanning engines simultaneously for maximum protection and blazing fast throughput. Resources are allocated based on the flow of data and the security services that data requires. For example, if web filtering needs more horsepower, additional processors are automatically applied so web traffic keeps moving and your business stays secure.

OTHER UTM SERVICE SUBSCRIPTIONS

WatchGuard offers eight security subscriptions for its XTM appliance family, its XTMv virtual solutions, and Firebox® T10 devices so that businesses can layer on protection where they need it most. Along with WatchGuard DLP, subscriptions include:

Application Control	Gateway AntiVirus
Intrusion Prevention Service	APT Blocker
Reputation Enabled Defense	WebBlocker
spamBlocker	

MANAGING SUBSCRIPTIONS IS EASY

All security functionality on your WatchGuard XTM, XTMv, or Firebox T10 solution, including UTM subscriptions, can be managed from a single intuitive console.

KNOW WHAT'S HAPPENING ON YOUR NETWORK AT ALL TIMES

- Any security activity identified by a service is logged and stored for easy reporting so you can take immediate preventive or corrective action.
- All management tools, including rich reporting and monitoring, are included with your WatchGuard XTM purchase. There is no additional hardware or software to buy.

BEST-OF-BREED UTM

WatchGuard uses a best-of-breed strategy to create the most reliable security solutions on the market. By partnering with industry-leading technology vendors, WatchGuard delivers an all-star family of UTM network security products.

- AVG**—A consistently high performer in independent Virus Bulletin testing provides the engine for Gateway AntiVirus.
- Cyren**—Patented RPD® technology in the Cloud provides spamBlocker with the only effective anti-spam solution for low footprint UTM appliances. Up to 4 billion messages per day reviewed.
- Websense**—Supplies the cloud-based URL database for WebBlocker. Security coverage is supplemented by Websense Security Labs and their ThreatSeeker Network.
- Trend Micro**—Leading provider of IPS and Application signatures, delivering comprehensive protection against the latest threats.
- Sophos**—Leading provider of email and endpoint security, including DLP, for enterprises worldwide.
- Lastline**— provides the cloud-based sandbox analysis and advanced evasion detection that powers WatchGuard APT Blocker.
