

Gateway AntiVirus

An integrated security subscription for WatchGuard® XTM appliances

Gateway AntiVirus scans traffic to identify and block known viruses and other malware

VIRUSES, WORMS, AND TROJANS ARE STOPPED AT THE GATEWAY

- Scans all major protocols, including HTTP, HTTPS, FTP, TCP, UDP, SMTP, and POP3 to block all types of malware.
- Email traffic is scanned at the gateway to stop threats before they gain access to your servers and execute their dangerous payloads.
- Suspect email can be flagged to go into quarantine, where administrator can restrict access or allow users to review quarantined files through automatic email alerts.
- Provides safer web browsing by preventing the download and execution of malicious code.

HIGHLY EFFECTIVE SCANNING

- Incorporates highly rated scanning engine from industry-leader AVG Technologies.*
- Signature database can be configured to check for updates hourly, ensuring timely, far-reaching coverage.
- Dynamic heuristic analysis uses code emulation to identify polymorphic viruses and dangerous code that signatures can't catch.
- Compressed and encoded files are decompressed for inspection, with wide compression support including .zip, .gzip, .tar, .jar, .rar, .chm, .lha, .pdf, XML/HTML container, OLE container (Microsoft Office documents), .cab, .arj, .ace, .bz2 (Bzip), .swf.
- Buffered scanning process ensures optimum performance for in-line HTTP scanning.

COST-EFFECTIVE VIRUS SCANNING

- Provide network-wide protection for all users configured behind your WatchGuard XTM firewall with a single Gateway AV subscription.
- Purchase Gateway AV bundled with our suite of powerful security subscriptions for even greater savings.

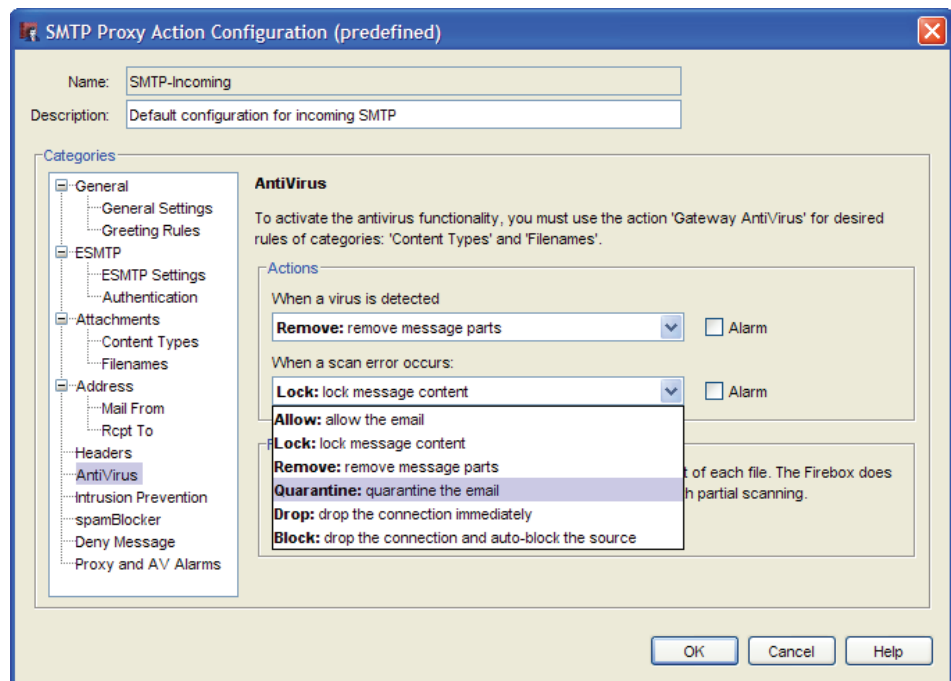

Gateway AntiVirus (Gateway AV) works in tandem with the application layer content inspection of the WatchGuard XTM solution to provide real-time protection against known viruses, trojans, worms, spyware, and rogware.

Why add a Gateway AV subscription?

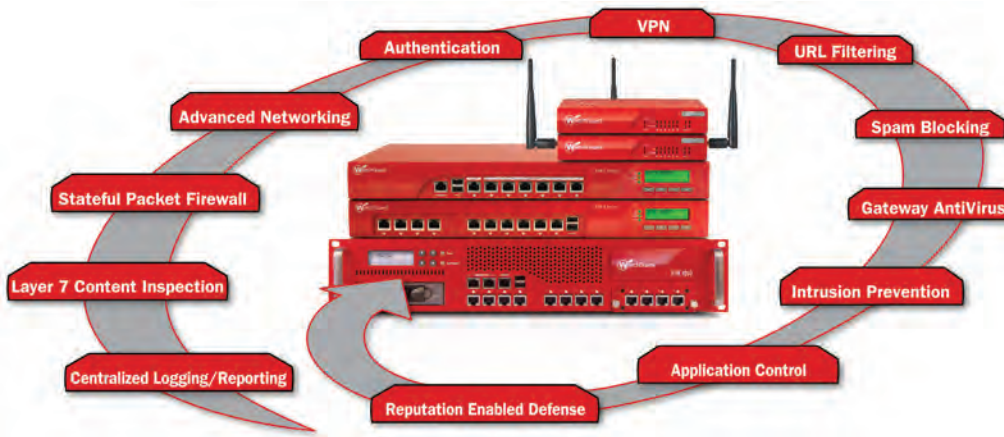

Gateway AV scans traffic on all major protocols, using continually updated signatures to detect and block all types of malware.

Running this anti-virus solution at the gateway puts another layer of protection in front of other anti-virus products running on desktops and servers for even greater defense in-depth.

It's easy to **boost protection where you need it most** – at the gateway – by adding a subscription for **Gateway AntiVirus**.

Fully Integrated Security for Comprehensive Protection

All-in-One Security Solution

WatchGuard XTM appliances combine with powerful security subscriptions to offer comprehensive protection from malware. All security capabilities are managed from one intuitive console, with centralized logging and reporting features for an up-to-the-minute view of network security activity.

Because the threat landscape is always changing, WatchGuard XTM solutions are designed to be able to easily add new network defense capabilities through security subscriptions, so costly hardware upgrades are not necessary.

Managing Security Subscriptions Is Easy

All security functionality on your WatchGuard XTM solution, including Gateway AntiVirus, can be managed from a single intuitive console for maximum efficiency and ease of use.

- Security activity identified by a service is logged and stored for easy reporting so you can take immediate preventive or corrective action.
- All management tools, including rich reporting and monitoring, are included with your WatchGuard appliance purchase. There is no additional hardware or software to buy.

Other WatchGuard Security Subscriptions

WatchGuard offers a full suite of security services to boost protection in critical attack areas. Along with Gateway AV, subscriptions include:

- **Application Control*** keeps unproductive, inappropriate, and dangerous applications off-limits.
- **Reputation Enabled Defense*** is a powerful cloud-based URL reputation lookup that protects web users from malicious web pages, while dramatically improving web processing throughput.
- **WebBlocker** URL and content filtering, with HTTP and HTTPS inspection, allows you to control access to sites that host objectionable material or pose network security risks.
- **spamBlocker** blocks nearly 100% of unwanted email in real time before it can reach your internal mail server or client.
- **Intrusion Prevention Service** provides protection from attacks that comply with protocol standards but carry malicious content.

Buy the Bundle and Get the Works

Get everything you need for complete threat management in one convenient package with a Security Bundle from WatchGuard. Each Bundle includes:

- Choice of WatchGuard XTM appliance
- **Application Control***
- **Reputation Enabled Defense***
- **WebBlocker**
- **spamBlocker**
- **Gateway AntiVirus**
- **Intrusion Prevention Service**
- **LiveSecurity® Service** for 24/7* technical support, hardware warranty, software updates, and threat alerts

Get a complete solution at an excellent price, with no additional fees, contracts, or hardware to purchase.

Got the Box? Get the Software Suite

If you already have a WatchGuard XTM appliance, turn it into a complete threat management solution with the Security Software Suite. The Suite includes all the security subscriptions listed above. (Suite does not include appliance.)

One-year, two-year, and three-year subscription packages are available for the Security Bundle and the Software Suite.

*Reputation Enabled Defense and Application Control are available for XTM appliances only.
**Technical support hours/days for XTM 2 Series appliances are 12/5.

**FREE
30-day
trials**

Get free 30-day trials of Gateway AntiVirus, Application Control*, Intrusion Prevention Service, Reputation Enabled Defense*, spamBlocker, and WebBlocker. Contact your reseller for details.
